

NEW BARCODE LABELS

Dear Practice Team,

we are pleased to announce that the barcode labeling of the samples is now available simplified. This was made possible by an optimization of our Laboratory-IT. In the future, we will provide you with a barcode label to identify the Request Form and the samples. In the following we describe the application:

- 1.** The first barcode label (left, imprinted on the label above „Schein“) is for the **Request Form** provided.
- 2. 15x barcode labels** are available for each patient (from the 2nd barcode label, imprint behind the number code, for example **(01, 02, ...** etc.) for the sample material.
- 3.** You also have 3x labels with a number code for **small sample containers** (for example **CapiSave®**).
- 4.** The lower label is intended for your **Laboratory Book** (name, date of birth of the patient, barcode number and barcode) as shown on page 2.

And here the good news: you can choose any label for the sample materials in any order. We want to make your daily life easier.

**Please note, that you are taking a new barcode section for each patient.
The unused barcode labels of a patient are discarded.**

In addition, there is the option with barcode label „Schein“ (Request Form) or barcode label for your Laboratory Book, to transfer the barcode number (as dial-up order number) in your IT-System as a sequence of numbers **(10 digits + 00)** or to scan via the barcodes.

If you have any questions, do not hesitate to contact us.

*With kind regards
your
Biovis Team*
